

Our Services

Happy Visits Happy visits are for anxious pets, reactive pets, new puppies and kittens – and honestly, any pet or owner who would benefit from seeing the place before their first appointment. No exam, no treatment, no pressure. Just a chance to walk in, meet the team, get a treat, and head home on a good note. Whatever your pet needs to feel comfortable here, we'll figure it out together and come up with a gameplan for the future.

Wellness & Preventive Care Good preventive care is built on two things: knowing your pet and knowing the science. We take both seriously. Wellness visits are where we establish that foundation – getting to know your dog or cat over time, staying ahead of what's coming, and making sure you always understand why we're recommending what we're recommending.

Dentistry Dental disease is the thing we wish more pet owners knew about earlier. Most pets have some degree of it by age three, and most of them won't show it. That's why we built a dedicated dental suite with digital dental imaging – so we can see exactly what's happening below the gumline, not just guess at it. [Before and after photos]

Surgery We know surgery can be stressful. We're obsessive about keeping you in the loop from drop-off to pick-up: text updates along the way, a call when your pet is in recovery, and we stay with them until they're ready to go home. No news is not good news here – we'll always reach out.

Diagnostics Digital radiography, ultrasound imaging, in-house bloodwork, urinalysis, cytology, and more. When something's off, we run the tests right here. Many results come back within the same visit – because waiting days for answers when your pet doesn't feel well isn't good enough.

Therapeutic Laser Therapeutic laser uses targeted light energy to reduce inflammation, relieve pain, and accelerate healing. We use it for post-surgical recovery, wound care, and a range of musculoskeletal conditions. It's non-invasive, well-tolerated by most pets, and often makes a noticeable difference – especially for older dogs and cats managing chronic pain.

Urgent Care Life with pets doesn't always stay on schedule. We see urgent cases during business hours – the things that can't wait for a regular appointment but don't require an emergency hospital. If you're not sure whether what you're dealing with counts, call or text us and we'll help you figure it out.

Microchipping Quick, simple, and one of the best things you can do for your pet. A microchip is permanent identification that stays with them for life. We can add it to any visit.

End of Life Care Saying goodbye to a pet is one of the hardest things we do – for you, and honestly, for us too. We approach end of life care with the same honesty and intention we bring to everything else: helping you understand what your pet is experiencing, what your options are,

and making sure that when the time comes, it happens with dignity and without rush. You don't have to navigate this alone.

Pharmacy We keep the medications we trust stocked in-house, so you can leave with what your pet needs the same day – no waiting, no extra trips. Prefer the convenience of home delivery? Our online pharmacy is available anytime. [Login or order here →]
